**Attachments:** image001.gif, RTCs from EPA+WaterBoard\_draft RAWP\_July 2017.pdf

Hello Kim,

EPA and Regional Water Board staff have reviewed NASA's responses to our comments on the Draft Removal Action Work Plan (RAWP) for the NTCRA at AOI 14. The responses adequately address our comments on the Draft, with the following exception:

Please revise the response to Specific Comment 3 (Section 2.2, page 14, and Figure 6) to include boring logs. At least one boring log in the area of the high resistivity result should be added to the RTC to support the explanation of why the red/orange area at depth is native and not fill.

Thank you,  
Yvonne

Yvonne Fong, Remedial Project Manager - US EPA Region 9, Superfund Division - 75 Hawthorne St (SFD-8-3), San Francisco, CA 94105 - (415) 947-411

**Subject:** NASA RTCs on AOI 14 Draft Removal Action Work Plan

Yvonne and Elizabeth,

Attached are NASA's responses to EPA and Water Board comments on the Draft Removal Action Plan (RAWP), including the appended Draft Stormwater Pollution Prevention Plan and Draft Protected Species Mitigation and Habitat Restoration Plan. Responses to comments on the Draft Sampling and Analysis Plan/Quality Assurance Project Plan will be submitted separately.

NASA has received comments from the California Department of Fish and Wildlife (CDFW) on the restoration plan and will work with CDFW to determine additional changes that may be incorporated into the final restoration plan. We will communicate any of these changes to you before the plan is finalized.

Please let me know if you would like to discuss the RTCs and if you would like to see a 'red line' markup of the Final RAWP based on these RTCs.

Thanks,  
Kim
