LARGE DIESEL EMERGENCY STANDBY ENGINES

Standards: Any large diesel emergency standby engines (> 1,000 BHP) "Generators" to meet EPA Tier 4 Emission Standards through purchase of an EPA-certified Tier 4 engine (no initial or follow-up source testing required) or purchase of a Tier 4 compliant engine (packaged by the engine manufacturer with abatement equipment) (follow-up testing required every three years after district-approved source testing conducted before installation).

The project will comply with the regulatory requirement to use the Air District's Best Available Control Technology and Best Available Control Technology for Toxics Workbook (BACT/TBACT) revised June 9, 2015 for commonly permitted sources subject to New Source Review in the Bay Area as a guide for permit applicants.

Any large diesel emergency standby engines should be screened prior to Certificate of Occupancy for each building. Screening shall be to the height of the generator and enclose all four of it sides. Buildings may be used for all or part of the enclosure.
