Subject: RE: H1 NTCRA - Data Summary Submittal for the High Occupancy Area of Zone 7 (Z7 HO DSS)

Hello John,

The EPA and Regional Water Board have reviewed the Hangar 1 NTCRA - Data Summary Submittal (DSS) for High Occupancy Area of Zone 7 and have no comments on the report. The EPA and Regional Water Board concurs that no further abatement is required for the high occupancy area of Zone 7 at Hangar 1.

Please contact me or Mary Snow if you have any questions.

Subject: RE: H1 NTCRA - Data Summary Submittal for the Low Occupancy Area of Zone 2 (Z2 LO DSS)

Some people who received this message don't often get email from dana.mccarthy@waterboards.ca.gov. [Learn why this is important](#)

Hi Garrett and John,

The Regional Water Board (WB) and the Environmental Protection Agency (EPA) reviewed the NTCRA Hangar 1 Data Summary Submittal for High Occupancy Area of Zone 2 received on May 23, 2023.

We noted during prior sampling events documented in the March and April 2023 Data Summary Submittals that at least one or more lead media blank samples did not meet the measurement performance criteria (MPC) of <QL. During the sampling event documented in

the May 2023 Data Summary Submittal, all four lead media blank samples did not meet the MPC. We understand residual lead dust may remain suspended in the air during sampling collection and that the detections are below the cleanup goal for lead. However, we are concerned there appears to be a systemic pattern that the data quality objectives (DQOs) for the lead media blank samples are not being met.

We have the following specific comments/questions regarding Section 3.4.2 Field QC Samples:

- 1) How does detections in the lead media blank samples impact the data from a DQO perspective?
- 2) When and how are the lead media blank samples collected following media-blasting activities?
- 3) Were there any corrective actions taken? If so, please describe corrective actions.
- 4) Are there additional measures that can be taken in the field to prevent or minimize these detections?
- 5) Do these detections warrant a field audit for quality control measures?

We will greatly appreciate your feedback to make sure the lead media blank data is usable for all subsequent sampling events. Please contact me and Lucrina Jones should you have questions.

Thank you,

Dana McCarthy, P.G.
