Good afternoon Garrett,

The San Francisco Bay Regional Water Quality Control Board (Regional Water Board) appreciates that NASA incorporated our difference of position on the protectiveness determination for the remedies subject to this Five-Year Review due to the presences of per- and polyfluoroalkyl substances (PFAS) in soil and groundwater. I.e., Our (the Regional Water Board) position is that the protectiveness determination of the remedy at Site 1, Site 22, Site 26, NASA RGRP, and NASA VI AOR is "Deferred Protectiveness" with respect to PFAS in soil and groundwater.

We concur with the Final Five-Year Review and look forward to the forthcoming investigations to address our concerns with respect to PFAS.

Regards,
Mary

Mary,

I posted the NASA Ames Research Center Five-Year Review into GeoTracker on Thursday, September 18th at 3:52 pm (see attached email).

Can you please release it so Alana and Yvonne can download it?

Hi Garrett,

I downloaded the Geotracker file version. It was the August unsigned by need the Brooks signed version. We still have not seen the sign version in Geotracker. Please send us the link to the final version.

Alana

Alana,

I have sent you both a link to the signed document and posted it in GeoTracker. Hopefully we won't have any more finals needed this time around.

Let me know if you need anything else.
